LinkedIn Profile

CORE COMPETENCIES

- Threat Detection & Analysis
- Vulnerability Assessment
- Penetration Testing
- Security Incident Response
- SIEM & Log Analysis
- Network Security Monitoring
- Risk Assessment & Mitigation
- Ethical Hacking / OSINT
- TCP/IP & OSI Model
- Firewall & IDS/IPS Config
- Cryptography Fundamentals
- Agile & CI/CD Security
- Military Leadership

TECHNICAL SKILLS

Security Tools:
Nmap, Metasploit, Burp Suite, Wireshark, Nessus, OWASP ZAP, Splunk, IBM QRadar, Sentinel

OS & Platforms:
Kali Linux, Windows, Azure, GCP

Languages:
Python, SQL, Bash, JavaScript

Frameworks:
NIST, MITRE ATT&CK, CIS Controls

CERTIFICATIONS

CompTIA Security+
IBM Cybersecurity Analyst Professional Certificate
IBM Ethical Hacking & Open Source Tools Pro Cert.
Google Data Analytics
Microsoft Azure AZ-900
Meta Front-End Developer
GitHub Actions & CI/CD

SOCIAL LINKS

GitHub
Portfolio Website
Tableau Public

PERSONAL SKILLS

- Analytical
- Decision Making
- Adaptability
- Strategic Thinking
- Teamwork
- Creativity
- Multitasking
- Emotional Intelligence

PROFESSIONAL PROFILE

Analytical and mission-driven U.S. Marine Corps veteran transitioning into cybersecurity with industry-recognized credentials including CompTIA Security+, IBM Cybersecurity Analyst Professional Certificate, and IBM Ethical Hacking and Open Source Tools Professional Certificate. Skilled in vulnerability assessment, penetration testing, SIEM analysis, TCP/IP networking, threat intelligence, and security monitoring. Combines technical depth in Python, SQL, Bash, and network security with a disciplined military mindset to protect systems and deliver measurable security outcomes.

WORK EXPERIENCE & KEY ACHIEVEMENTS

Freelance Cybersecurity & Data Analyst

Jan. 2021 – Present

Remote, Beaufort, SC

- Conducted vulnerability assessments and security audits on client systems using Nmap, Nessus, and OWASP tools to identify and remediate critical exposures.
- Built automated threat-detection and log-monitoring scripts in Python to flag anomalies and generate incident triage reports, reducing response time by 40%.
- Configured and tested firewall rules, IDS/IPS policies, and endpoint protection settings as part of client security hardening engagements.
- Delivered 70+ end-to-end projects across cybersecurity, data analytics, and software development using Python, React, SQL, and TensorFlow.
- Maintained clean, version-controlled code via Git/GitHub following Agile and CI/CD security principles; earned 230+ certifications across security, cloud, and DevOps.

Criminal Justice IT Specialist (Intern)

Jun. 2018 – Jul. 2018

Beaufort County Detention Center, Beaufort, SC

- Improved system efficiency by 30% through streamlined IT solutions, optimized data workflows, and enforcement of access control and security policies.
- Supported compliance audits and regulatory review processes, ensuring systems aligned with law enforcement security and data protection standards.
- Boosted system uptime by 20% by identifying and resolving performance and security bottlenecks in collaboration with law enforcement personnel.

Store Worker

Jun. 2012 – Present

Defense Commissary Agency, Beaufort, SC

- Reduced stock discrepancies by 30% through POS and inventory data analysis to improve accuracy and minimize loss.
- Optimized operational workflows, increasing transaction speed by 50% and customer foot traffic by 15%.

Assault Amphibious Vehicle Crewchief (AAV)

Apr. 2008 – Apr. 2012

U.S. Marine Corps, Camp Lejeune, NC

- Maintained and troubleshot advanced mechanical and electronic systems under high-pressure, mission-critical conditions.
- Led and trained cross-functional units in AAV operations, security protocols, and mission-critical procedures.
- Employed advanced navigation and reconnaissance tools to deliver timely operational intelligence in dynamic environments.

RELEVANT SECURITY PROJECTS

Facebook Ad Conversions – Security & Anomaly Analysis

Oct. 2024

- Applied linear regression and Shapiro-Wilk statistical tests in Python to detect data integrity issues and assess exposure risk in campaign datasets.
- Visualized anomaly detection outputs using Matplotlib to present security-relevant distribution findings to stakeholders.

Global Superstore – Data Modeling & Security Hardening

Sept. 2024

- Restructured and normalized a MySQL relational schema to reduce redundancy, enforce data integrity, and mitigate SQL injection vulnerabilities.
- Built interactive Tableau dashboards for real-time business visibility and anomaly monitoring.

Little Lemon – Secure Database Project

Sept. 2024

- Implemented a hardened MySQL data model with secure stored procedures and parameterized queries to protect booking and order workflows from injection attacks.

EDUCATION

B.S., Computer Science and Information Science

2015 – 2020

Park University, Parkville, MO — GPA: 3.5 / 4.0

B.S., Criminal Justice Administration

2013 – 2018

Park University, Parkville, MO — GPA: 3.4 / 4.0
